AWS CLOUD ENGINEERING | CLOUD SUPPORT | JUNIOR DEVOPS

AWS Certified Solutions Architect - Associate with hands-on cloud engineering projects using Amazon S3, CloudFront, IAM, AWS CLI, AWS Lambda, API Gateway, DynamoDB, and infrastructure as code. Combines cloud engineering training with 13+ years of technical leadership in automated manufacturing, production troubleshooting, and process improvement. Transitioning into cloud engineering, cloud support, and DevOps roles.

CERTIFICATION

AWS Certified Solutions Architect - Associate | Amazon Web Services | September 2026 - September 2029

TECHNICAL SKILLS

AWS: Amazon S3, CloudFront, IAM, EC2, AWS CLI, Lambda, API Gateway, DynamoDB, CloudFormation

Infrastructure & DevOps: Terraform, Infrastructure as Code (IaC), Git, GitHub, Linux, deployment workflows

Development: HTML, CSS, JavaScript, REST APIs, serverless and event-driven architecture

Operations: Technical troubleshooting, incident response, access control, documentation, process improvement

SELECTED CLOUD PROJECTS

AWS Static Portfolio Website | Amazon S3, CloudFront, IAM, AWS CLI

- Built and deployed a static portfolio website on Amazon S3; used AWS CLI for deployment tasks.
- Configured S3 access policies and CloudFront distribution settings, including HTTPS redirection.
- Maintained HTML, JSON configuration, and portfolio assets in a GitHub repository.

Serverless E-Commerce Application | AWS Lambda, API Gateway, DynamoDB

- Built a serverless e-commerce backend using Lambda, API Gateway, and DynamoDB.
- Implemented REST API functionality and applied event-driven architecture and NoSQL data-modeling concepts.

Enterprise Cloud Migration Project | AWS, Terraform

- Developed an enterprise migration plan from on-premises infrastructure to AWS.
- Applied Terraform and infrastructure-as-code concepts in the project; deployment scope can be discussed in an interview.

DAWIT S. CHERENET | AWS CLOUD ENGINEERING

PROFESSIONAL EXPERIENCE

Paint Cell Leader | Mitchell Plastics | 2013 - Present

- Led daily operations across automated paint production lines, coordinating team activities, production priorities, quality, and equipment readiness.
- Diagnosed and resolved technical and process issues on paint lines PL1 and PL6, helping limit downtime and maintain production continuity.
- Investigated quality deviations, communicated production issues promptly, and supported corrective actions to keep lines operating to standard.
- Identified practical improvements to workflows and equipment-related processes; supervisors recognized independent troubleshooting and problem-solving.
- Trained and supported employees in production procedures, safe equipment operation, and quality requirements; helped coordinate shift and weekend coverage.
- Applied systematic troubleshooting, operational monitoring, prioritization, and cross-team communication skills transferable to cloud support and operations.

EDUCATION AND TRAINING

AWS Cloud Engineering and DevOps Training | Afro-Coders Hub LLC | Completed 2025

Practical AWS, cloud deployment, Linux, Git, architecture, and infrastructure-as-code training.

Technical Diploma in Plumbing | Addis Technical College, Ethiopia | 2003

One-year vocational technical training.

ADDITIONAL PROFESSIONAL DEVELOPMENT

- AWS Skill Builder - 40+ completed learning courses and modules.
- Computer Skills Program - foundational computer applications training.
- Technical and workplace safety training in industrial operations and equipment-related practices.

PORTFOLIO AND PROJECT EVIDENCE

GitHub: github.com/dawitAbbay

Portfolio work reflects completed technical projects and training, not paid cloud engineering employment.

TARGET ROLES

Junior Cloud Engineer | AWS Cloud Support | Cloud Operations Associate | Entry-Level DevOps Engineer
